Exam : **HQT-4230**

Title : Hitachi Vantara Qualified
Professional VSP One File
Installation

Vendor : Hitachi

Version : DEMO

NO.1 Which factor determines the capacity of a Hitachi VSP One File storage pool?

- A. Number of users
- B. Number of allocated LUNs
- C. Total number of installed drives
- D. Network bandwidth

Answer: C

NO.2 How do Dynamic Provisioning pools enhance performance in Hitachi VSP One File?

- A. By distributing data evenly across all available disks
- B. Through manual data migration
- C. By limiting the number of active users
- D. Using dedicated cache memory

Answer: A

NO.3 What is a primary benefit of using Hitachi Dynamic Provisioning pools?

- A. Fixed allocation of storage resources
- B. Improved storage utilization
- C. Simplified backup processes
- D. Reduced data transfer times

Answer: B

NO.4 What role does the Hitachi Ops Center play in the software architecture?

- A. Provides hardware monitoring
- B. Manages file system operations
- C. Offers centralized management and analytics
- D. Controls data backup processes

Answer: C

NO.5 How can access control be managed for Hitachi VSP One File across different operating systems?

- A. Using NTFS permissions only
- B. By setting up separate file shares for each OS
- C. Through unified ACL management
- D. By using different file systems for each OS

Answer: C

NO.6 How does Hitachi VSP One File support disaster recovery planning?

- A. By providing built-in virtualization capabilities
- B. Through dedicated disaster recovery hardware modules
- C. By offering integrated snapshot and replication features
- D. By limiting data replication to identical systems only

Answer: C

NO.7 Which protocol is commonly used for management communication in Hitachi VSP One File?

- A. FTP
- B. SNMP
- C. HTTP
- D. SMTP

Answer: B

NO.8 What protocol is commonly used for file system access by Microsoft Windows clients in Hitachi VSP One File?

- A. NFS
- B. SMB/CIFS
- C. FTP
- D. HTTP

Answer: B

NO.9 What is the main benefit of using link aggregation in Hitachi VSP One File?

- A. Increased storage capacity
- B. Enhanced network redundancy and throughput
- C. Simplified network configuration
- D. Reduced power consumption

Answer: B

NO.10 Which protocol is NOT supported by Hitachi VSP One File models for data management?

- A. NFS
- B. SMB
- C. iSCSI
- D. Fibre Channel

Answer: D

NO.11 How does the Hitachi VSP One File hardware architecture handle cooling requirements for its components?

- A. By using passive cooling only
- B. By integrating advanced active cooling systems
- C. By relying on external cooling devices
- D. By not requiring any cooling mechanisms

Answer: B
